

# NueMicro

**NUEMICRO** is a premium liquid micronutrient blend designed for foliar application to correct or prevent nutrient deficiencies in a wide range of crops. Powered by amino acid complexes, NueMicro offers rapid absorption and translocation while supplying essential cations like magnesium, zinc, copper, iron, and manganese—plus boron and molybdenum—for balanced plant development and stress tolerance.

## Guaranteed Analysis:

Total Nitrogen (N) .....	1%
• 1% Nitrate Nitrogen	
Soluble Potash (K <sub>2</sub> O) .....	2%
Magnesium (Mg) .....	4%
• 4% Water Soluble Magnesium	
Sulfur (S) .....	5%
• 5% Combined Sulfur	
Copper (Cu) .....	1%
Iron (Fe) .....	0.5%
Manganese (Mn) .....	0.8%
Zinc (Zn) .....	0.5%
Boron (B) .....	0.3%
Molybdenum (Mo) .....	0.01%

*Derived from: amino acid complexes of magnesium, copper, iron, manganese, and zinc; boric acid; sodium molybdate; potassium hydroxide; potassium nitrate.*

## Key Benefits:

- **Fast-Acting Foliar Micronutrients:** Supplies critical micronutrients for fast deficiency correction and improved crop quality.
- **Amino Acid Chelation:** Enhances nutrient mobility and plant uptake, especially under stress conditions.
- **Supports Energy and Metabolism:** Provides essential nutrition for chlorophyll production, enzyme activation, and reproductive growth.
- **Versatile and Crop-Flexible:** Ideal for row crops, specialty crops, and forage systems with documented micronutrient needs.

## Application Rates:

Apply as a foliar spray, diluted in a minimum of 12 gallons of water per acre. Shake well before use.

Crop Type	Application Rate	Application Frequency
Row Crops	16–32 oz/acre	Vegetative and early reproductive stages
Specialty Crops	16–32 oz/acre	Pre-flowering through active growth periods
Root & Tuber Crops	16–32 oz/acre	Tuber or bulb initiation through bulking
